

LANDLORD and/or ASSOCIATION APPROVAL

If you do not own the building or property in which you intend to install your satellite system you are required to obtain the permission of the landlord, property owner, and/or association. Installation of any satellite system may require modifications to the building and property. Modifications may be significant. Any type of modification may be forbidden pursuant to the terms of your lease/rental agreement or may require pre-approval by the landlord.

Please be advised that landlord approval is often the case with multi-tenant buildings.

Prior to installation you should carefully review your lease agreement to determine if you have the right to make such modifications. If landlord approval is required please request that the landlord, or their authorized representative, sign the bottom of this form to acknowledge authorization for the installation and provide this signed form to the certified installer at the time of the installation. If landlord permission is not required please indicate that below and sign.

In no event shall CPE Labs have any obligation to remove your satellite system subsequent to its installation for any reason. In no event shall CPE Labs (including any certified technician) have any liability whatsoever related to any damages your landlord might claim as a result of any alleged violation of your lease/rental agreement as it relates to the installation of your satellite system.

Please note that in the event the landlord does approve the installation but only in a way that makes the installation more expensive or exceeds what is offered in a subsidized "free standard installation" the ordering customer shall be responsible to pay for any and all such additional costs.

Please complete either 1 or 2 below:

Please Print:

1. I _____ hereby authorize _____
(landlord/authorized representative) (name of tenant)

To install a satellite system at _____
(tenant/installation address)

Signature of landlord/authorized representative Date

2. Landlord approval is not required to install a satellite system located at:

(Installation Address)

Signature Date
